## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 5-8, 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furgason or Massa et al. in view of Sawyer.

Furgason or Massa et al. teaches all the limitations of the claims except for the metal spray forming containment sleeve. However, Sawyer discloses a metal spray-forming device for forming a sleeve 52 around a mandrel 50 (figure 1). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Furgason or Massa with a containment sleeve forming by metal spraying as suggested by Sawyer. Doing so would provide suitable shape or pattern to produce a free standing or net-shaped solid.

With respect to claim 6, Furgason or Massa did not disclose expressly that each segment is of 0.125-0.75. However, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to select a length for each segment of the nozzle.

3. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Furgason or Massa et al. in view of Sawyer as applied to claims 1, 5-8, 20-23 above, and further in view of Hashish et al.

Furgason or Massa et al. in view of Sawyer teaches all the limitations of the claims except for a jewel orifice. However, Hashish et al discloses a jewel orifice 1 for an abrasive water jet nozzle. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Furgason or Massa and Sawyer with a jewel orifice as suggested by Hashish. Doing so would provide an effective abrasive nozzle.

***Allowable Subject Matter***

4. Claims 43-55 are allowed.
5. Claims 17-19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments filed 26 March 2004 have been fully considered but they are not persuasive.
7. Applicant's arguments with respect to claims 1, 5-8, 20-24 have been considered but are moot in view of the new ground(s) of rejection.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee

pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q Nguyen whose telephone number is 703-305-0248. The examiner can normally be reached on Mon-Fri 6:30-4:00 alternate Friday off.
